Power (kW) to: 10
Efficiency class:
Efficiency: 76
Made of:
Fuel type:
Chimney diameter, mm:
Shape of glass:
Item type:
Warranty, year: 5

Description

"Invicta" fireplaces are made of high-quality cast iron. All fireplaces comply with European ecological norms. Fireplaces produced by "Invicta" in France have a "Green Fire" certificate.

Features:

- The fireplace is made of cast iron. Cast iron has long been characterized by thermal conductivity, resistance to mechanical and temperature effects. Heat is stored in cast iron fireplaces and then radiated into the environment.
- Ceramic glass is heat resistant up to +750°C.
- Fireplaces are assembled in Invicta's factories in France - the components are sealed with fire-resistant silicone and secured with nuts and bolts.
- All parts in contact with fire are replaceable.
- The secondary combustion system helps to burn the fuel better, resulting in less emissions to the environment.
- High fireplace efficiency - up to 76%, so less fuel is consumed.
- Clean glass support function. The air flow is directed on the inner surface of the glass, so the glass does not smoke.

The power is adjustable within the limits: 6.5 - 15kW, nominal power 10kW.

The chimney is connected at the top.

Maximum firewood length: up to 50 cm.

The fireplace body is guaranteed for 5 years.
