

Thrust regulator TRV Honeywell FR 124-3/4AM

Product code: K9HON-9200-4258

Brand: Array

Category: Boilers > Katilų atsarginės detalės

PRICE : €39.29

About the product

Manufacturer:

Country of origin:

Height, mm: 149

Width, mm: 23.9

Depth, mm: 177

Item type:

Warranty, year: 2

Description

The thermostatic boiler draft regulator is designed to automatically regulate the air supply to the solid fuel boiler. An attached 1 meter long chain opens and closes the air supply valve to the combustion chamber depending on temperature changes, thus increasing or decreasing the boiler power. On the top of the knob, the temperature is set, which is supported during combustion. Can be installed horizontally or vertically, suitable for solid fuel boilers of various manufacturers.

Connection: 3/4"

Maximum water temperature: 115 degrees

Operating temperature limits (set on the top of the handle): 30 - 90 degrees

Maximum chain load: 100 - 600 g.
