Color:

Fuel type:

Chimney diameter, mm:

Wall thickness, mm: 0.8

Item type:

Insulation thickness, mm: 50

Warranty, year: 5

Max. temperature, C: 600

Description

Chimney system for removing combustion products from sauna stoves by natural draft. Stainless steel chimneys comply with EU standards and are characterized by durability and reliability. Chimneys are made of 0.8 mm stainless steel, and the double-walled chimney elements have a 50 mm insulation layer, which helps to ensure the safety of the sauna even at the highest temperatures.

We offer a standard chimney package, which you will need when installing a chimney in a standard outdoor sauna.
